

Design Challenge

By: Chelsea Chiu9-4

What I want to Design

I want to create a wall that can shrink, so that it can block noise and open it for others to see. And each wall are about 4-5 high and eighth in total.

Materials

I designed the material of this wall into a whiteboard and a glass wall. In this way, the teacher in the class can write on the whiteboard while maintaining the original sense of perspective.

Detail

Here is a small detail: I also designed a movable wall in the middle. If I do personal work, I can also have a personal space.
