

This picture was taken zoomed in from a long distance

This picture was taken from a shorter distance but the picture was also taken zoomed in

this picture is zoomed in a lot and I made the focus to the skin colored plant

This picture was zoomed in into a colored plant and the flower beside it catches eyeballs

This picture is taken to the focus of the leaves on the left, but the water turned out to be a great background.

This picture made a little blur in the leaves to make the water the focus

This picture is taken when the water on was moving, this made the picture look alive

This picture is a zoomed in photo with the soil and the rock being the focus

This picture focused on the plant in front of the camera

This picture show a really nice sunshine and color contract is shown

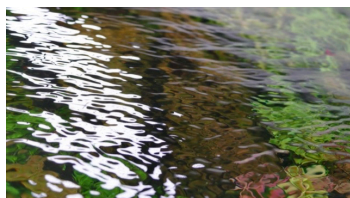

This is a picture of a natural habitat

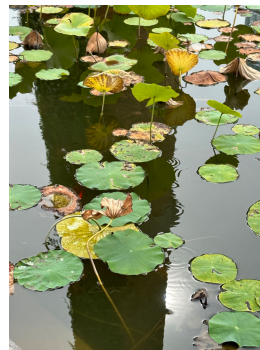

This pictures focus is put on the little snail

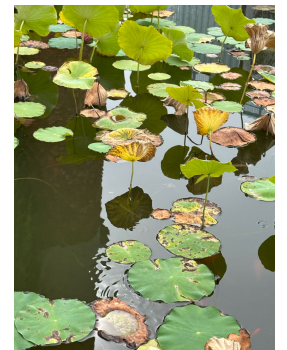

This picture has a really good focus and it gives the people relieving vibes because of the sunlight

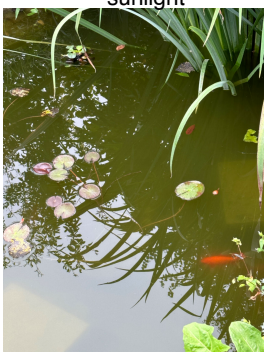

This is a picture of a natural water habitat and the reflection of the water

This is the surface of the water

This is another picture of the surface of the water

This picture's focus is supposed to be more on the fish, but the focus shown is more on the reflection

This photo's focus is about the snail and the leaves/plant

This is a picture taken to reflect to the image in the chosen artist, this picture is taken from a long distance and it is about nature

This is also a long distance photo taken, it is about nature but it is a different angle
