

ALL ABOUT HUMANISM

I am 80% humanist
What about you?

ONE 4/5

Education

Rediscovery of the Greek and Roman texts led people to explore more moral, philosophical, and historical content. The study of fine arts, astronomy, and many more was promoted. Humanist also believes that everybody has the right and chance to learn and have an education.

TWO 4/5

Individualism

Humanist believes that everyone has control over their own lives and can achieve greatness. What status you were born in does not equal your value ability and dignity.

THREE 3/5

Question Everything

Humanists believe we shouldn't unreservedly believe what others say. Don't be indoctrinated by the church or people of power. We should explore, discover, and question the world. They thought it right to be themselves, and think for themselves.

FOUR 5/5

Secularism

Humanists wanted a separation of religion from civil affairs. A departure from religion in politics, and education. To minimize the role of religion. This does not mean people stopped believing or worshipping the supernatural. I strongly agree with this idea due to the effect we see in modern times of the country that are not secular.
